06 October 2016

Attention: **PAPM Partners**
SUBJECT: **Technical and Trainings Committee Update as of September 2016**

Dear Partner,

Updates on the active task forces below:

BPS Task Force

- BPS/TF met September 13 at the Bacolod Chicken Inasal Greenhills while BPS/TC25 last September 28 at the Red Panda Greenhills.
- Scanned minutes of the recent meeting as issued by DTI attached herewith.
- BPS/TF will meet October 11 at the Red Panda Greenhills while BPS/TC25 on October 25 at the Kahuna Beach Resort in San Juan, La Union.

EWC Task Force

- EWC has not yet retracted the blog citing the use of leaded paints on school furniture that has put our members, namely Roosevelt Chemicals and TNC, in a compromising situation.
- Following our talk with their Mr. Manny Calonzo and the mention of this in last month's report still not meriting action, a formal complaint will be issued by the Association tomorrow, hopeful that an amicable settlement of the issue may be reached.

PTC Task Force

- PTC 1 students had their finals last September 28 and their graduation during the GMM coinciding with our observance of the Philippine Paint and Industry Week held last night at the Legend Villas Hotel.
- The offer from Adamson University College of Engineering to include PTC as part of their curriculum as an elective subject will have to take backseat for now that the current resource of the committee is very limited.
- Having said this, we are appealing for more Tech Com volunteers to help in the effort to further maximize the opportunities being given our industry.

United with you as we move towards globalization and greener innovations.

Very truly yours,

Vergel V. Dyoco
Director
Technical & Trainings Committee
